-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Interview Summary***

The Examiner has contacted Mr. Eric S. Hyman on 2/16/10 to suggest claim language amendment, as supported by drawings and specification, to render the claims having **means for** language allowable. It appears, as illustrated at least in fig. 1, item 110 is a server, item 120 is a station, item 142 is a multiplexer etc.

However, Mr. Hyman apparently need time to consult with his client and was unable to render a decision at the time.

***Claim Rejections - 35 USC § 112***

Claims 1 – 9 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 5, and 6 use the phrase "**means for**", but it is modified by some structure, material, or acts recited in the claim. It is unclear whether the recited structure, material, or acts are sufficient for performing the claimed function which would preclude application of 35 U.S.C. 112, sixth paragraph, because although a means for performing a specified function is an acceptable definition of an element or subcombination of a combination and such a means shall be construed to cover corresponding structure and equivalents thereof, function must be specified and thus would be capable of a determination of structural equivalent thereof; structureless terms

Art Unit: 3661

without a function specified therefor affords no basis for judging whether a structure different from that disclosed by Applicant would be equivalent thereof.

If applicant wishes to have the claim limitation treated under 35 U.S.C. 112, sixth paragraph, applicant is required to amend the claim so that the phrase "means for" or "step for" is clearly not modified by sufficient structure, material, or acts for performing the claimed function.

If applicant does not wish to have the claim limitation treated under 35 U.S.C. 112, sixth paragraph, applicant is required to amend the claim so that it will clearly not be a means (or step) plus function limitation (e.g., deleting the phrase "means for" or "step for"). Claims 2 – 4 and 7 – 9 are necessarily rejected based upon their dependency on their respective base claims.

#### ***Allowable Subject Matter***

Claims 10 and 11 are allowed. The prior art of record fail to teach a method for transmitting geographic information by using a digital broadcasting network comprising, among other limitations, a) collecting real-time geographic information and real-time traffic information from a central/local geographic information collecting network; b) extracting/processing local geographic information and local traffic information from the collected geographic information/traffic information and outputting whole area information and geographic information/traffic information for a plurality of resolution

Art Unit: 3661

levels; c) converting and transmitting the outputted geographic information/traffic information data outputted from the step b) in conformity to digital broadcast signals; d) multiplexing the geographic information/traffic information data transmitted in the step c) with local geographic information data; e) performing encryption during the multiplexing in the step d) so that whether to allow a user to use the information be determined based on whether the user is a subscriber and what subscriber class the user belongs to; and f) transmitting the multiplexed geographic information/traffic information data to a corresponding region.

Again, claims 1, 5, and 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
